

Press Release

Zee Learn Gakken Science Academy now in Hyderabad

Zee Learn, part of Mr. Subhash Chandra promoted Essel Group, has now launched its Science Academy for schools in Hyderabad.

The academy was launched in the felicitation event organized by Hyderabad Recognized Schools Association on Sunday. The academy conducted demo of science experiments during the event which received an overwhelming response from the audience.

Over 300 schools present in the audience experienced the magic and simplicity that science holds. Whether it was the floating ball experiment put to life or the Bernoulli's principle simplified, the audience was simply awestruck.

Mrs. Sangeetha Varma, General Secretary, Hyderabad District Recognized Schools Association said, *"Zee Learn Gakken Science Academy has brought to life the discussions that we have been having about revolutionizing the learning styles and making it effective."*

The academy has its R&D centre in Japan. Zee Learn has joined hands with a leading educational company Gakken Educational Co., to bring the best of Japanese innovation in the field of science education to India. Gakken Educational Co. brings with itself more than 65 years

of experience in the field of science education in international markets.

The academy believes that science for young children should involve asking questions and probing for answers. Productive questions provide a bridge between what the children already know and what they experience through an activity. The objective of academy is to help children realize that answers about the world can be discovered through their own investigations.

a question
today?

"Zee Learn Gakken Science Academy aims to provide an environment that fosters scientific thinking by giving young children the time, space, and materials to exercise their curiosity."

The academy is joining hands with schools to promote development of scientific thinking among children. It can be set-up with the existing facilities of the school without any additional space requirements. The dedicated coach conducts the program in the school premises itself. The program structure is such that its classes can be accommodated within the school's working hours for the convenience of the students. In order to build awareness about the program, the academy is conducting free demo at schools. Schools can book a free demo at www.zeelearngakken.com
